United States Launch Model

\$36,000

Stadia works with any model of church, but the majority of U.S. churches we help start are served through our Launch Model.

This model guides church planters through our Discovery Center, Startup Services, Training, Coaching, Cohorts, and Post-Launch services.

This model typically starts with a team in a physical location, and has Stadia's guidance from pre-launch through post-launch and beyond!

You can help start new churches that thrive, grow, and multiply in the United States by investing in this model and equipping church planters with our services at no cost to them.
